

Carolo-Cup 2017

This year's Carolo-Cup took place on February 8th, 2016 in Braunschweig. The Chair of Computer Science 11 supported the Team GalaXIs, which achieved only an average place due to a short circuit in the battery only a few hours before the final challenges. We congratulate the six members of the team and look forward to the next Carolo-Cup 2018. Preparations already begun - for more information and how to participate visit <http://galaxis.rwth-aachen.de>.
