

Andreas Polzer received his doctor's degree

We are congratulating our colleague Andreas Polzer on receiving his doctor's degree at our department! The examination took place at the 11th of December 2014 and the topic was "Ansatz zur variantenreichen und modellbasierten Entwicklung von eingebetteten Systemen unter Berücksichtigung regelungs- und softwaretechnischer Anforderungen". This time the usual procession to the town hall ended at the Christmas Market.
