

Animate Mini-Robots!

As in the year before, the Embedded Software Laboratory participated in this year's Girls' Day at RWTH Aachen University. Under the guidance of [Ibtissem Ben Makhoul](#) and [Martin Schweigler](#), seven students of classes 6 through 8 built and programmed LEGO® robots. We hope that the memories of fun and fascination will last. We would be happy to meet the girls again one day - maybe as students of computer science.
