

MULTIFORM reached all goals

The MULTIFORM project has been given best grades by the European Commission. Already on July 4 and 5, the project partners, who include the Chair of Computer Science 11, met in Sønderborg, Denmark for scientific and organizational exchange. One week later, the official review meeting took place in Brussels. The final rating was introduced by one reviewer saying that there is no fun in reviewing a project that has no flaws. Therefore, all project partners can wait calmly for the written project evaluation and concentrate on the final twelve month of the project.

Within the MULTIFORM project, the Chair of Computer Science 11 was granted a quarter of a million Euro.
