

Driving Assistance Systems and Model-Based Automotive Development

Content

This seminar will deal with model-based development in the automotive area with a focus on driving assistance systems.

Workflow

The seminar is a block seminar. The first meeting will be either at the end of the semester holidays or at the beginning of the winter semester. The presentations will take place in February 2009 on two consecutive dates. There will mandatory deadlines for the papers and slides inbetween.

Requirements

- Participation on all dates
- Getting familiar with the topic on your own
- Written elaboration of 10-15 pages / person using our template
- Presentation of 30 minutes (strict) / person
- Deadlines are strict (you can mail the files. You won't get the Schein if you miss any of the deadlines more than once!)
- The paper and slides must be composed by you only. All sources and aids must be specified and quotes must be marked.

I²p

All relevant material and information will be published and announced on the [I²p platform](#). Communication will be carried out via the I²p platform as well.

Documents
