

Lousberglauf 2016

Our group participated in this year's traditional Lousberglauf. 13 runners started for our associated i11Freunde e.V.. Mr. Andreas Derks was the first of our group reaching the finish line in only 23:42,7 minutes. The others followed him up and down the wavy course with a length of 5555 meters. The Chair of Computer Science 11 congratulates every participant.
