

Best Paper Award @ MEMICS 2010

The paper *Test-Case Generation for Embedded Binary Code Using Abstract Interpretation* written by [Thomas Reinbacher](#), [Jörg Brauer](#), [Martin Horauer](#), [Andreas Steininger](#) and [Stefan Kowalewski](#) has received a best paper award at [MEMICS 2010](#). The paper describes the first results of the [CEVTES](#) project on automatic test-data generation for embedded binary code. CEVTES is a joint-project of the Embedded Software Laboratory, the Technical University of Vienna, and the University of Applied Sciences Technikum Vienna.
