

Embedded Software Laboratory at SPS IPC Drives

From 19.11. - 21.11., the Embedded Software Laboratory presents its latest research results in the area of PLC control and analysis at the SPS IPC Drives in Nuremberg: RTAndroid and Twistturn allow for using standard tablet hardware for complex control tasks in real time. Arcade.PLC can analyse and verify PLC programs. In addition, it can detect typical programming errors automatically. Visit us at stand 510 in hall 11.
