PV1000 at 150 Years RWTH - The Exhibition

As part of the university's anniversary celebrations for “150 Years RWTH Aachen”, an exhibition is being held at the Centre Charlemagne. Among other things, the PV1000 pandemic respirator, which was co-developed at the Chair Informatik 11, will be exhibited as an initiative from RWTH. Ten prototypes of the PV1000 are currently being built for further testing during development.
