# Girls' Day at i11

Image: http://girls-day.de

At the Girls' Day on April 28th the chair of i11 arranged an embedded-systems-workshop. Eight participants from class 6 to 8 constructed and programmed small self-propelled robots, which can react to their environment with the help of sensors. As well at the Girls' Day: Dr. Kleindiek from Bundesjugendministerium, who took a picture with the girls.

The day with Natalie, Keara, Ines, Jasmin, Anna-Marie, Nina, Emma und Emely was very fun. See you soon!
