Forschungstätigkeit

Die Arbeit als studentische Hilfskraft an [The HyReach Toolbox](#) brachte mich erstmals in Kontakt mit Matlab und der Thematik der Verifikation eingebetteter Systeme. Begeistert von der Thematik schrieb ich meine Masterarbeit zum Thema „Statische Analyse von Matlab-Simulink-Modellen mittels Intervallen“ was schließlich mit Beginn meiner Tätigkeit als wissenschaftlicher Mitarbeiter am Lehrstuhl Informatik 11 zu einer Beteiligung am [artshop](#)-Projekt führte. Neben dem generellen Interesse für die Verifikation eingebetteter Systeme interessiere ich mich derzeit insbesondere für das Testen von Matlab-Simulink Modellen und wirke an der Entwicklung von [Arttest](#) mit.

Abschlussarbeiten

Bei Interesse an einer Bachelor- oder Masterarbeit im Themenbereich Testen und Verifikation von modellbasierter Software im Automobilsektor informiere ich gerne unverbindlich über derzeit verfügbare Themen.
