About

Bassam Alrifaae is currently a Senior Researcher and a Lecturer with the Chair of Embedded Software, RWTH Aachen University, Germany. He is the founder of the [Cyber-Physical Mobility Group](#) and [Lab](#). His research interests include: 1) networked control systems; 2) service-oriented architectures for embedded software; and 3) applications of 1) and 2) to connected and autonomous vehicles. He is a principal investigator of several projects. From 2011 to 2017, he was a Research Associate with the Institute of Automatic Control, RWTH Aachen University, where he received his PhD.

The website of the [Cyber-Physical Mobility Group](#) provides more information on my research and teaching activities as well as funding acquisition.

A complete list of my publications can be found in [Google Scholar](#).
